

REMEMBER THE FUTURE

Report on the encounter with the Red Queen — Porto X, Tuscany, from N.S.1.39.03.19.43 to N.S.1.39.03.24.48 [October 2026]

There are gatherings you attend to learn something new. And there are gatherings you leave with the feeling that you have remembered something you already knew, deep down. The two seminars with Stephanie South, Red Queen Kin 185, held at Porto X near Arezzo, belong unmistakably to the second category.

For a few days, this beautiful estate immersed in the Tuscan countryside welcomed us into a special atmosphere. Porto X is one of those places where the relationship with nature is not just a phrase to post on social media, but a concrete attempt to live differently. Its two custodians, guardians of the Earth, strive to inhabit this space in harmony with nature, together with the animals and people who choose to share time, work and experience in this small world.

And it is here that we gathered with Stephanie South — feminine heir to the great lineage of the Votan Mages, carrier of the GM108X Galactic Maya Mind Transmission, worldwide representative of the Thirteen Moons Peace Movement and keeper of the Law of Time lineage transmitted by José Argüelles, Master Valum Votan.

A FIELD CREATED TOGETHER

One of the most surprising aspects of these days was discovering that the real event was not the one written in the programme. There was a schedule, of course. But the actual content was built day by day, moment by moment, with what each of us brought — not in words, but in frequency. Stephanie arrived with an intention and a transmission, and the field activated. From there, we were all co-creators. And as always happens when the field is authentic, we were exactly who we needed to be. Resonance cannot be forced.

THE RED QUEEN

Stephanie South embodies the archetype of the Red Queen in its fullest sense: the feminine that welcomes, receives, creates. She lives in retreat, for most of her time, in meditation and reception of the GM108X flow of the Galactic Maya — as far as possible from the noise and density of the 12:60. And yet the encounter was intimate, human, fraternal. Graceful in her simplicity, she came close to everyone. She listened to each one of us. She was always present — never distant, never exclusive, never closed. Quite the opposite.

Stephanie doesn’t teach. She transmits. Her mode is experiential and intuitive, rooted in the GM108X flow of the Galactic Maya Mind. Her work consists in creating the conditions for participants to come into contact with their own perceptions, intuitions and inner capacities. Listening is not enough: you have to be there, participate, engage — and be willing to explore territories that cannot always be explained with a tidy definition in a notebook.

The gratitude she left in the hearts of those who were able to receive her presence, her listening, her embraces and her words is still there, alive.

THE MAIN MESSAGE: WE ARE NEARLY AT THE END OF THE CYCLE

What was the central message? To realise that we have almost reached the end of the 52-year Sirian cycle, which began in 1987 with the Harmonic Convergence — the powerful event of 16/17 August of that year, when three ancient prophecies converged: the Buddhist Kalachakra, the Hopi, and the Mexican prophecy of Quetzalcoatl. All three shared the same vision: the beginning of a New World capable of leading humanity beyond mechanised and artificial time. From there, Valum Votan launched the current New Sirius Year cycle, which will complete in 2038/2039 — one hundred years after his birth.

Only 13 years remain. It is time for all those who know the foundations of the Law of Time to move forward, to spread them, to live them deep in their cells until they are fully embodied.

Are we ready to carry ourselves into the future, imagining ourselves in 2039 and beginning to remember the events that unfolded between 2026 and that point in Time? We are a time-release timeship.

ITALY AS A GATEWAY

This event opened something unprecedented. For the first time in the recent history of the movement, a direct channel of connection was created between Italy and the Foundation for the Law of Time — human and vibrational at once. An alliance born with the clear intention of working side by side, united and coordinated, to anchor the 13:20 frequency and move forward in the world with confidence.

And there is a deep reason why this makes sense right here: Italy is the territory where the Gregorian calendar was born — that 12:60 frequency that has been imposed on the world for centuries. That a response should take shape from precisely this place is, to say the least, synchronic. Let's cultivate the Noosphere!

WE ARE ONE. I AM ANOTHER YOU.

A significant part of the work unfolded through the galactic families, following the symbolic structure of the Tzolkin and the Dreamspell. We divided into groups, shared perceptions, worked together and experienced how different a journey can be when we stop trying to do everything alone.

The work with the galactic families made visible something that often remains abstract: the concrete possibility of feeling part of something greater. Perceiving oneself within one's galactic family, and then merging with the others, allowed us to experience the beauty of being human — even in an increasingly chaotic and distracting time. Perhaps especially in this time.

The collective dimension was fundamental. It was not simply about being many people in the same place, but about learning to collaborate, to listen to one another and to contribute to a shared experience. When a group manages to do this without losing sight of the meaning of what it is doing, something beautiful happens. Differences need not disappear: they can become resources.

This collective experience now becomes the foundation of a new Italian Round Table: an organisation of souls who want to create, root the teachings of Valum Votan and carry forward the work of Antonio Giacchetti, in a spirit of transformation and union. A small group of self-realised people is enough to change everything!

AND THEN WE TRIED TO REMEMBER THE FUTURE

The theme of telepathy was one of the most significant elements of the experience. In the first phase, the work focused on remembering who we are. In the second, we shifted our attention toward the future — seeking to enter into relationship with possibilities that go beyond the ordinary way we think about time.

One of the most intense moments was an exercise in collective telepathy: each person was invited to receive a message from their future self. What if some of the answers we are looking for are not found by accumulating more information, but by learning to listen in a different way? What if the future were not only something waiting for us ahead, but a possibility we can already enter into relationship with now? The real work is only within ourselves.

THE OLD MAKES WAY FOR THE NEW. WE ARE ALREADY THE FUTURE.

If the first 26 years of the First New Sirius Cycle saw the spread of the Thirteen Moon Calendar, the birth of the PAN and the transmission of the principles of the Law of Time, the second 26 years — from 2013 to 2039 — are the time of activation. No longer merely learning: embodying. We are the time travellers. And even when passing through turbulence, chaos and confusion — the Storm teaches us this — everything is useful: to clear the old, to make space for the new. These final 13 years of the Cycle call us to root what has already been seeded. It is important to take responsibility for self-realisation.

And we can say it, without hesitation: the Light is already visible.

KIN 48, YELLOW SOLAR STAR

The final gathering took place on Kin 48, Yellow Solar Star [Gregorian: Tuesday 13 October 2026] and represented the natural conclusion of this journey. With a detail that, for those who know the history of the Law of Time, adds an additional layer of meaning: these seminars unfolded in particular synchronic resonance with the Kin during which José Argüelles, Valum Votan, had been in Italy at Cisternino, bringing to the world for the first time the tool of the Synchronotron, which he left in that very place. A call to the continuity of a path, to the passing of teachings and to the possibility that what was seeded in the past continues to find expression in the present.

WHAT WE BRING HOME

Attending a Red Queen seminar changes you from within. It opens the senses and helps elevate consciousness from the condition of victim to that of creator. Do not complain about what is happening to you: create something new. Take your position and join those who are making a difference through responsibility for their own lives, moving beyond fear and co-creating a new world.

We certainly bring home new insights to explore the Law of Time, the Dreamspell and the relationship between consciousness, nature and universe. But also something less easy to pack in a bag: the feeling that, amid all that distracts and fragments us, there is still a space in which we can stop, listen and find a direction again.

The future is not a distant destination to reach. It is a question to inhabit, a possibility to explore, a memory to recover.

Perhaps we are truly here to remember something we forgot along the way.

As Valum Votan said: *He who owns your Time, owns your Mind. Know Time and you will know your Mind.*

…from the transmission of the Red Queen:

We have to become generators of new energy, generators of the energy of the heart.

You cannot force resonance.

Earth is a timeship that releases memory codes over time, in resonance with the Sun.

Never forget art, keep working; everything can change everything.

Human mind needs to be reprogrammed.

Transform reactivity into creativity.

Permission can only come from within.

We have to be free so that we can create.

We have to become emotional alchemists.

The codes help us rebuild ourselves and become energy generators.

The future is the song that sings to you.

Inner work is a full-time job; we cannot afford to spend our time arguing with one another.

Reality has to be practiced; we can turn it into whatever we want.

It is frequency that controls technology.

There is a golden path that has simply been covered up.

What is our highest vision?

In Lak'ech 🌈 Round Table Italy 13.20
