

BOSNIAN PYRAMIDS AND TIMESPACE MATRICES

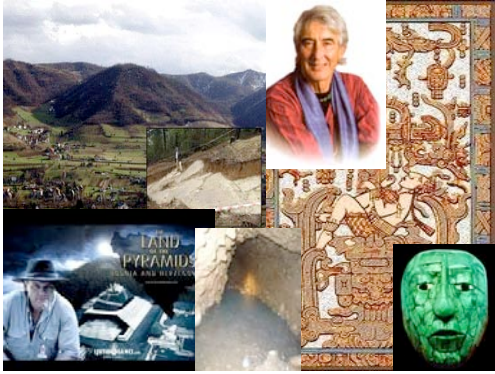

During this year of 2012, volunteers from 52 countries came together to aid in the fascinating project of discovering and exploring several pyramids in Visoko, Bosnia and Herzegovina, in what once was part of my former country, Yugoslavia. Until now 840m of underground tunnels had been excavated. They were part of the 2,5km main long tunnel leading to the Pyramid of Sun. Only this year, the Pyramid's mystery, and what may lie under them, has attracted some 35.000 visitors who wish to help this project of planetary importance. Until now the process of discovery has uncovered two civilizations, with two different goals or "plans": the first constructed tunnels and pyramids while the second concealed the same passages. The first dates point to more than 12.000 years ago and the second to about 5.000 years ago.

According to Maya's count, those *nonpareil* engineers of time who lived in Central America, the first date could be associated with the disappearance of the civilization of Atlantis and the second, with the historical cycle beginning 5.200 years ago, more precisely on the 13th of August 3113 BC and ending this year on 21 of December 2012.

According to the Law of Time discovered by Jose Arguelles—doctor of history of art and ethics, visionary investigator of mathematic codes and Mayan mathematics, founder of the Galactic Research Institute and Foundation of the Law of Time or, as his biographer Stephanie South said, "galactic genius, cosmic visionary, planetary artist and Spirit Messenger"—around 5.000 years ago we started to forget our multidimensional nature. That was the time of separation from the original divine plan and the beginning of the experiment of free will. It was the time of beginning of our encapsulation into artificial mechanic time, the density of the third dimension in which truth could only be detected by physical senses.

It seems that the civilization that blocked the tunnels knew that they had to hide something precious that our civilization would not be able to recognize ... until now. The tunnels were opened 7 years before the end of the cycle, 7 years before entering into a new eon of consciousness (we should note that 7 is one of the most important numbers in the mathematics of time).

In some way this date can be compared with that of the hidden tomb of Pacal Votan discovered in 1952, exactly 1260 years after the dedication of the tomb in 692, or 1320 years before the end of the cycle. Those dates contain codes of the artificial time frequency 12:60 as a base of the cycle of history, and the frequency of galactic time 13:20, in which we are about to enter. The hidden number of this frequency is 7, the difference between 13 and 20 (20 fingers and 13 joints of which the 7th is in the middle – our spine / in our body we are keeping the knowledge of natural time).

The tomb of Pacal Votan is a kind of terma (Buddhist concept of hidden treasure that one generation leaves for another knowing exactly when it will be discovered and by whom, but anyway, the real treasure is embedded inside the terton, the one who discovers it, while the *object* has the function of triggering the relevant knowledge from his unconscious.) The terton of Pacal Votan's tomb was Dr. Jose Arguelles, and the terton of the Bosnian pyramids is Dr. Semir

Osmanagic. Those pyramids were always there, we were looking at them, but we didn't see them, nobody but this one man. And, how strange, Pyramids have a similar destiny to most of us who are in some way forging the bridge to the new era: people look at us, but they don't accept us as who we really are.

Fortunately, everything is perfect: both the dream we were dreaming 5.125 years ago and the mind shift towards the noosphere, the mental envelope of the Earth or planetarization of consciousness or our collective unconscious which is now making a leap into its conscious phase.

A group of Chinese kin from Taiwan just visited the Pyramids, little tertons who are familiar with the instruments of the Law of Time, principally Dreamspell and few of them with Synchronotron as well, the new instrument for learning the mathematical language of telepathy which includes the entire Law of Time. They came from so far away led by necessity of connection with the energy of this sacred place. Isn't this motivation one more piece of evidence that the whole grid of sacred places doesn't belong to one nation, the one which happens to be there, but to the whole world. We keep forgetting that the word WORLD is not plural, but singular, because the world really is ONE.

Searching for the purpose of this journey, which in some strange way started to look like a pilgrimage, we discovered that all sacred places not only connect all of us, the seekers of truth beyond our physical senses, but that they are connected by one plan, a particular mathematical reality. This absolutely amazing confirmation we received from the research of one gentleman called Carl Munck, who arrived at this result on the basis of "shamefully simple mathematics", where the geometry of the place provides the information of its precise position on the Earth expressed in degrees, minutes and seconds.

Using base 360 mathematics, Radians, Pi, Phi and Fibonacci sequences, Munck discovered that 83.000 ancient sites on Earth, mainly pyramids, temples, places with specific geometric forms such as Stonehenge or Nazca's lines, follow the same principle. This leads us to the conclusion that there is one plan as a result of one mind, one advanced civilization connected with the unified mental field. Everything has its own precise place and its precise purpose as part of ONE SYSTEM.

Drunvalo Melchizedek (pseudonym of Bernard Perona, creator of the Mer-Ka-Ba meditation) considers that it was thanks to one plan that was designed to bring back the level of consciousness which existed a long time ago, before the sinking of Atlantis. According to his

explanation, this net of sacred places was needed to change the Earth's inner energetic flow. Carl Munck concludes that the history we were taught is completely wrong. And surprisingly, he was not the only one who thought so: so did Semir Osmanagic, the author of "Alternative history" and Jose Arguelles, with Stephanie South, who wrote the seven volumes of the "Cosmic History Chronicles".

Is the world ready to start to write the pages of this new history which accepts the Thirteen Moon Calendar, accepts the existence of pyramids in the middle of Bosnia and Serbia (mountain Rtanj is considered to be another pyramid) and existence of one net of sacred places, as well as so many other discoveries in so many areas, which are expanding the limits of our mind, our consciousness? Would we impede this awakening happening at the perfect time, at this very end of history?

Katarina, Storm 1, brought the knowledge of Law of Time from Chile to ex Yugoslavia, one of the first who accepted it (through Cica, Skywalker 3) was Mira, Human 8, who taught Ana, Wind 10, who taught a group of Chinese people in China and Taiwan, who then came to the Bosnian pyramids where all three of us were waiting with an 8-day program based on Synchronotron and Qigong. What kind of luminous paths are those kin (kin=person who knows his/her galactic identity, solar seal and galactic tone) transiting from one end of the world to the other, spreading the knowledge with such thrill and feeling of light flowing through every cell of their beings?

Guided by Dr Sam Osmanagic, Seed 4, an expert on pyramids who made a brave hypothesis that in the center of Europe there exists the highest (220m) pyramid in the world, the group received the greatest information and shared the spirit of this great discovery! Beside participating in the different types of meditations, including the Rainbow Bridge and ceremonies on the pyramids in the form of green hills and underground tunnels,

the program included the Prayer of the Seven Galactic Directions, daily synchronizations and activation of light points based on work with the timespace matrices of the Synchronotron by acupuncture needles or colorpuncture, activation of Hunab Ku 21 archetype template, sound healing with solar mantras, planting of crystals and corn seeds (from Votan's anniversary ceremony altar on the Crystal Wizard) on the top of the Pyramid of Sun, energetic work with Tibetan and crystal bowls, drums and gong. Thanks to Galactic Human's hard work each member of the group received their Synchronotron information and Planetary Wind gave us an initiation in Qigong, that ancient Chinese practice and art of maintaining good health and balance through aligning

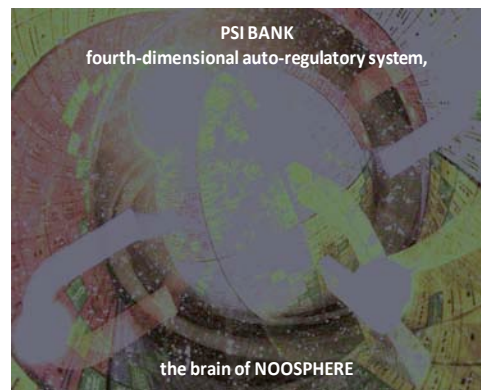

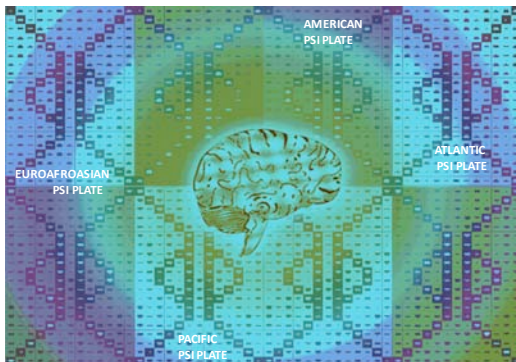

breath, physical activity and awareness. Mario, Crystal Mirror came from Zagreb, Croatia, to make a powerful bridge between the 13 Moon calendar and shamanic work. The group also visited well-known places such as Sarajevo, Mostar, Medjugorje and a few ancient monasteries of different religions.

What kind of hidden plan are we fulfilling and, at the same time, being rewarded with joy, love and with our paths meeting each other while new ones are opening? Psychologist, agronomist, doctor of medicine? It doesn't matter! Christians, Buddhist or Sufi? It doesn't matter! White or yellow race? It doesn't matter! Middle age, young or old! It doesn't matter! This wave of awakening is splashing in without making differentiation and we are emerging transformed although without completely understanding what is going on, and advancing in such an accelerated way. Prophecy is coming true; the new world is arising in front of us. Unsuspected force and inner engine do not stop. We are all going forward, while the veil is lifting up!

But let us return to the incredible discovery of Carl Munck. He claims that latitudes should be measured not from Greenwich, but from the Pyramid of Cheops in Giza, being this zero point and the center of the whole land mass of the world. And, what a surprise, in Galactic Maya's transmission through the Law of Time, the whole Psi Bank grid, the brain of Noosphere (noos-mind) begins at the same latitude. The Psi Bank (or Akashic records) is presented with 8 Tzolkin Matrix, Harmonic Module or Sacred Mayan Calendar which embraces the whole Earth starting exactly from Giza. Each plate made of two Tzolkins which cover 90° of the planet and both hemispheres: $260 \times 2 = 520$ units. So, the Psi Bank or Akashic records, the complete memory/library of the planet, consist of 4 plates with 520 units each ($520 \times 4 = 2080$).

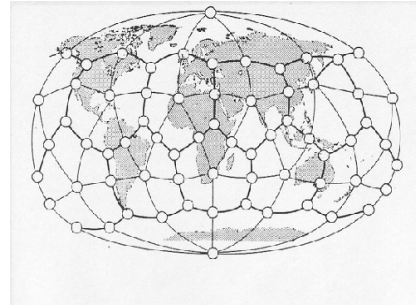

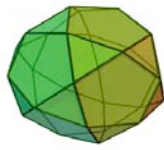

PSI BANK 360_ around the equator longitude coordinates and 90_latitude coordinates.

The Tzolkin or Mayan Sacred Calendar is a harmonic matrix made of 20 solar seals and 13 galactic tones which gives one totality of 260 units. It is a fractal measure of radial time and perfect cycle of the 13:20 frequency of universal synchronization.

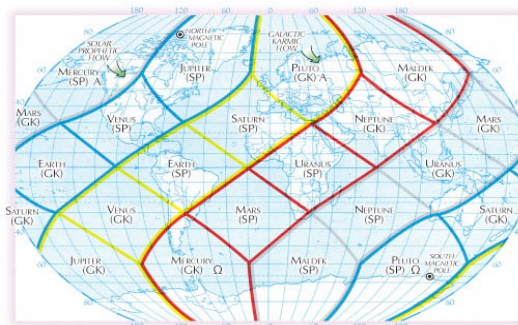

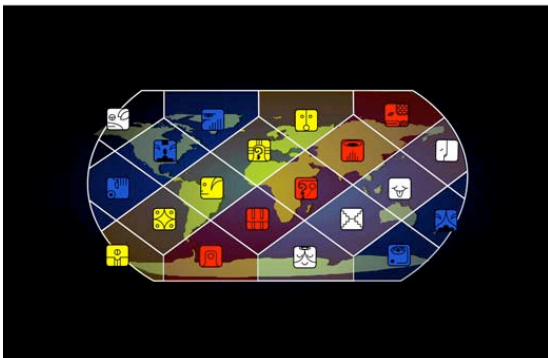

On the other side, the grid of sacred places can be presented with icosidodecahedron which is made up of 20 triangles and 12 pentagons

Icosidodecahedron
20 triangular faces and 12 pentagonal faces

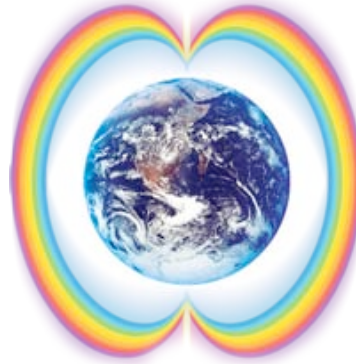

According to Law of Time, the number of space is 12, while the number of time is 13. A Cube has 6 inner and 6 outer sides, 12 in all, while 13th is in the middle – 12 sides belong to third dimension of space, and 13th invisible point in the middle belong to the fourth or time dimension.

On the other hand, the Law of Time works with the Planet Holon, the fourth-dimensional Earth divided into 20 bioregions where each bioregion vibrates with the frequency of one of the 20 solar seals, while connected with one planet (analog seals are connected with one planet), so each bioregion is coded with one whole planet as well. This would be the fourth-dimensional Earth grid which overlays the third-dimensional grid.

PLANET HOLON – SHOWING PLANET DESIGNATIONS

In his study, Munck is using one additional instrument, and that is an ancient *gematria*, a system of assigning numerical value to a word or phrase. For example, number 144 means light and 288, double light or Kingdom of Heaven. It is very interesting that the Cheops pyramid was covered with 144.000 polished casing stones that made it shine from great distance so this pyramid was called “Ta Khut” which means ‘The Light’. In the Bible 144.000 marks the number of Jesus’ followers, the number of chosen ones. There are 144 (72 on each side of human body) nadis or etheric channels through which prana or light flows. According to the Mayan Long Count, every period of 13 baktuns has 144.000 days, and all 13 baktuns together mark the duration of the historic cycle of 5.200 years. Is this a mere coincidence?

There is something more! That same number marks the Harmonic value for the speed of light: 144.000 arcs per grid second ($E= mc^2$). $288 (144 \times 2) = 2c$ where c is the speed of light harmonic ($E= mc^2$). So, 288 is harmonic of light expressed with prophesied Rainbow Bridge around the Planet Earth. That light is connected with Aurora Borealis and Australis, Northern and Southern lights which appear when solar winds, solar flares and coronal mass ejections hit the terrestrial magnetosphere. So, in other words, we could say that 288 is harmony of Earth's light expressed in the form of circumpolar Rainbow Bridge which is absolutely based on scientific facts and at the same time is the prophesied vision of a great number of native people all around the world. **The Rainbow Bridge Meditation** represents one of the most powerful and unifying meditations that humanity can do now at the end of the cycle as it is harmonizing, balancing the magnetic pole shift and empowering the electromagnetic field of the Earth and each of us.

That same number, 288 we find in 20 Tablets of the Law of Time (biotelepathic program which uses the 64 hexagrams of the I Ching in a completely new matrix of 13:20) when 64 codons of DNA are ordered in the table 8x8.

1	2	3	4	5	6	7	8
9	10	11	12	13	14	15	16
17	18	19	20	21	22	23	24
25	26	27	28	29	30	31	32
33	34	35	36	37	38	39	40
41	42	43	44	45	46	47	48
49	50	51	52	53	54	55	56
57	58	59	60	61	62	63	64

288
= (144x2) harmonic of polar light
12_x2=288

64 DNA codons = the power of the creation of life.
1+2+3.....+64=2080=units of Psi Bank

Arguelles' discovery of the 20 Tablets of the Law of Time is about the last 16 years (1997-2013) program of genetic error of humanity reflected in our complete disconnection with nature, our inner being and multidimensionality of life. They reveal the fascinating overlapping of Sacred

Mayan Tzolkin calendar with 64 DNA codons, and Chinese I Ching, as well as with the Psi Bank, the meditative program of activation of latent codons of DNA and the Rainbow Bridge Meditation. This year, several groups of Chinese kin were fascinated to receive this knowledge about such a close connection between their sacred book of I Ching and Tzolkin.

"I am here to fulfill one mission that had started long ago, in other dimensions, on other stars. My mission is to restore time and telepathy matrices. And, after our departure, at the end of Baktun 9 (year 435-830) our team and me, we made the commitment to come back."- Jose Arguelles. Synchronotron seminar 2009, Cisternino, Italy.

Synchronotron is the system and the method of intergalactic telepathic communication based on mathematics and matrices through which we are receiving telepathic information. In higher dimensions, telepathic language is the language of numbers because every number is a telepathic frequency.

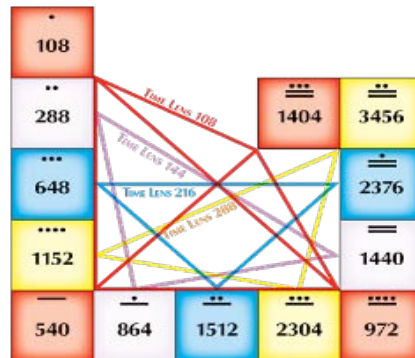

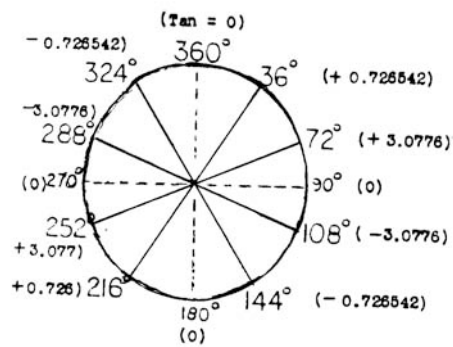

The magic of numbers Arguelles already distinguished in his study, *Dynamics of Time-Evolution of Time as Consciousness*, in chapter 19, paragraph 13: All is number. God is a number. God is in all. Or as Pythagoras says "Numbers are the language of the universe."

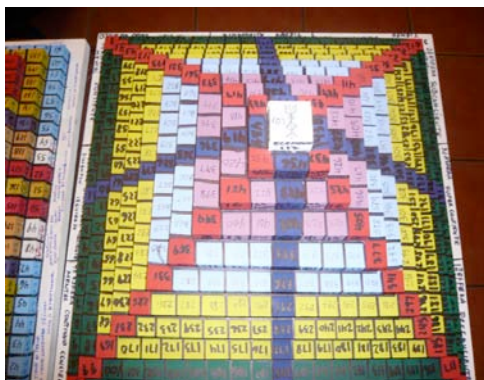

Synchronotron opens us to completely new frontier of "the TIMESPACE as the function of different creation matrices that can be mathematically and geometrically postulated". So, here we have Synchronic matrix, Basic matrix, Space Matrix and Time Matrix, four different matrices arranged in different sequences where their overlay creates different effects and opens our mind to different aspects of our consciousness.

1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20	21	22	23	24	25	26	27	28	29	30	31	32	33	34	35	36	37	38	39	40	41	42	43	44	45	46	47	48	49	50	51	52	53	54	55	56	57	58	59	60	61	62	63	64																																																																												
61	62	63	64	65	66	67	68	69	70	71	72	73	74	75	76	77	78	79	80	81	82	83	84	85	86	87	88	89	90	91	92	93	94	95	96	97	98	99	100	101	102	103	104	105	106	107	108	109	110	111	112	113	114	115	116	117	118	119	120	121	122	123	124	125	126	127	128	129	130	131	132	133	134	135	136	137	138	139	140	141	142	143	144	145	146	147	148	149	150	151	152	153	154	155	156	157	158	159	160	161	162	163	164	165	166	167	168	169	170	171	172	173	174	175	176	177	178	179	180	181	182	183	184	185	186	187	188	189	190	191	192	193	194	195	196	197	198	199	200

In Synchronotron we find more connection with Munck's grid of sacred places. His base 360 mathematics and the Synchronotron's four time lenses as the base of all galactic tones, shows us that both are based on same numbers: 108, 144, 216 and 288.

And the last surprise!!! All these time matrices can be represented in the form of a pyramid, energetic generators on the Planet Earth! At an international Synchronotron meeting in Tepic, in Mexico, 2011, the organizing and educational team of kin, as well as representatives of the Foundation for the Law of Time, are showing these matrices in the form of Pyramids.

Synchronically, in one of the last messages from Stephanie South - Red Queen (the journalist who during Arguelles' last ten years accompanied him and collaborated in the edition of his last investigation of Cosmic History, recognized as his apprentice and now in charge of the Galactic Research Institute), she writes about her dream in the chamber of Temple XIII, where the tomb of Red Queen was found, and how Valum Votan/Jose Arguelles appeared:

“There was a single computer sitting in the center. He [Jose] indicated telepathically that this computer was a type of control panel linked directly to the main control panel at the center of the Earth. He informed me that the center of the Earth radiates light beams of information that connect with all of the pyramid structures on the planet. I understood these as the interplanetary regeneration chambers. He was also communicating something about the pyramids being overlays of a particular matrix structure that can be understood through the 441 (21 x 21)-cube matrix.”

In the *Book of the Timespace*, one of seven volumes of Cosmic History, Arguelles states that timespace is a medium that exists for the organization of intelligent life and forms. *“We are actually leaving a particular timespace and entering a new timespace—this is a quantum shift, mind shift. At this point everything comes down to zero and a cosmic pause occurs and the dissolution of the previous hologram, followed by the imprinting of the new timespace*

hologram. We are shifting to a new evolutionary stage—the Noosphere or Second Creation. If we are awake and attuned, we will realize our divine nature.”

Highly grateful to Hunab Ku, Valum Votan and Red Queen, to Semir Osmanagic, to each member of this wonderful and unique group and their organizer in Taiwan, the most loving person Rafeeka, Lunar Eagle, Sufi, sanniyasin, powerful spiritual guide organizing the huge Rainbow Bridge meditation for the event of closing of the cycle, and, of course, to Ana’s great organization in Bosnia!

At the end of this incredible journey most of which synchronically took place within the wavespell of the Seed-kin 144, the farewell greeting of base group of 16 Rainbow warriors was: *“see you again at next summer’s adventure of digging pyramid tunnels as volunteers with our brain light points already activated!”*

Katarina, Magnetic Storm

Year of the Blue Resonant Storm
