

Alexander Trofimov , Taisia Kuznetsova

**International Scientific Research Institute of
Cosmo-Planetary Anthropoecology named
after academician V.P.Kaznacheev (RUSSIA)**

REPORT

**Based on the protocols submitted by the participants of
«Oarion» transplanetary experiment that took place
11/08/2015 as a part of ISRICA's «Man in Kozyrev's space»
program.**

Design:

This is a study of a remote, (ethereal) bridge, a connection established between Karahunj Observatory (Karahunj, Armenia) and a Kozyrev Mirrors' system based in Novosibirsk, Russia during the Rise of the Orion (a constellation that has been historically connected to many ancient civilizations) on the 11/08/2015 from 06-00 to 07-00 am (UTC +6). Apart from these two locations, there were more than 100 participants in other parts of the world. Together they comprised a model of a synchronised collective consciousness of the humanity.

The purpose of this study was to determine a possibility of instantaneous communication between humans and other Holographic Universe civilizations in Kozyrev's Space.

The Objective:

To transmit and receive symbolic information during a transplanetary session between participants in Karaunj, Armenia and on Akkem lake, Republic of Altay, Russia, using various types of Kozyrev's Mirrors, holograms of a new kind and holographic water.

The list of participants:

- ! ISRICA (Russia) – the scientific coordinator
- ! Foundation for the Law of Time and Dr. Jose Arguelles's Galactic Research Institute (USA)- the coordinator
- ! Vazgen Gevorkyan and his research group in Erevan (Armenia)
- ! «Heavenly Lotus» Health Center in Moscow (Russia),
- ! A group of researchers from Live Ethics Commune (Italy)
- ! A group of researchers from Sophia and Varna (Bulgaria)

The locations of the participants and the conditions they were in during the experiment:

1. ISRICA's genuine Kozyrev's Mirrors were operated by Dr. Taisia Kuznetsova (left photo). Five matrices were placed inside the mirrors 20 minutes prior to the onset of the experiment, 3 of those matrices had been prepared by the operator a day before, on 10/08/15. Dr. Kuznetsova used a personified hologram. 10 minutes before the experiment, she drank the holographic water processed via the «Eye of Sirius» hologram. Another operator, Dr. Olga Oseeva (right photo), was in the same room where the Mirrors were, 2 meters away from them. Three other participants were at home during the experiment.

2. Heavenly Lotus Health Center. The operator, V. Stasiv was in Karaunj, Armenia when the experiment took place. Three other participants were in the Heavenly Lotus Health Center in Moscow, and another 3 were in various European parts of Russia.

3. Bulgarian group.

Two participants were in Varna and another one was in Sophia.

4. Live Ethics Commune. Six of the participants were in Instituto Del Cuoro, Montegiove (TR), Italy. twenty two other members of the Commune were in Altay, Russia, near the Akkem lake. Their camp was located on the left bank of the lake. Banner of Peace was the cornerstone element of their transmissions. Every participant drank holographic water before the transmission, 8 of them were holding the Eye holograms in their left palms, while looking towards the Belukha Mountain.

5. Armenian group (3 participants) in Karahunj Observatory, Armenia.

6. Galactic Research Institute (Dr. Agruelles's group). The members of the group from 23 countries were in their respective locations during the experiment. All in all, we've gathered 78 protocols from

this group. The cornerstone element of their transmissions was the Foundation for the Law of Time's Planetary Kin system.

The results

We've received 119 individual protocols:

- ! 5 from Novosibirsk
- ! 3 from Bulgaria
- ! 4 From Moscow
- ! 26 from Italy
- ! **78 (!)** from the Galactic Research Institute

The primary protocol information was processed via various methods and assessment tools developed by Dr. Kuznetsova.

The Type of Perception Scale was the first tool used to assess the received information. The most frequently occurring data was highlighted and assigned to one of the types of perception of information:

Kinesthetic perception of vibrations, shuddering, feelings of fever or extreme body cold, pressure inside the subject's head or body and/or reeling clock- or counterclockwise was recorded 19 times (15, 9%).

Various emotional reactions were described by 22 participants (18,4%). Those included emotional discomfort – 4 (3, 3%); positive emotions, such as a feeling of unity, love, cordiality, a possibility of an interaction with some kind of higher powers - 18 (15,1%).

Changes in the perception of time were mentioned by 9 participants, all of them members of the Italian group in Altay.

Symbolic information.

Thirteen protocols (10,9%) contain information on certain manifestations of extraterrestrial consciousness, of observers (flying objects, extraterrestrial constructions and beings, angelic creatures). Forty-eight protocols (40,3%) contained data regarding cosmic objects such as planets and constellations:

14 (11, 7%) contained symbolic depiction of the Sun

13 (10, 9%) contained symbolic depiction of the Moon

15 (12, 6%) contained symbolic depiction of the Sirius constellation (AKA Canes Venatici), the S letter in different variations, the images of dogs, dog sleds, dolphins.

6(5,1%) contained images of the Orion constellation

25 (21%) energy objects, spirals spinning clock- and counterclockwise, spheres, waves and dots

33 (27, 7%) – various geometric objects, flat and three dimensional: triangles, rectangles, circles, spheres, tetrahedrons, octahedrons, cubes, cones, mathematical matrices.

26 (21, 8%) – Egyptians symbols (pyramids, Gore’s Eye, depictions of cats, Ankh symbols, mummies)

14 (11, 7%) – Banner of Peace images

17 (14, 2%) images of five point stars

15 (12, 6%) images of six point stars

The data received by the participants was then assessed with the use of 2 specifically designed scales.

Scale #1. Points (0-3) were used to assess the strength and qualities of the resonance that the participants achieved within the data flux while conducting the experiment.

- ! **0 points** – total absence of data

- ! **1 point** – separate pieces of data that share some sort of connection with the theme of the experiment.

- ! **2 points** - Symbolic information, images or verbally expressed data, partially coinciding with the transmission data

! **3 points** – data most closely resembling the initial transmission

Scale #2. This scale was used to determine the degree of resonance between the Consciousness of participants and the Kozyrev's Mirrors operators (the transmissions from ISRICA in Novosibirsk and another mirror system on Dixon on 11/08/15).

The degree of resonance was awarded from 0 to 9 points, the exact number was determined according to a vibrational frequency chart compiled with the use of an individual telepathic technique, "Information Modules" created by Dr. Kuznetsova.

Dr. Arguelles's group's protocols. To create a holographic model of a collective consciousness in Kozyrev's space during this research, the group prepared 78 protocols that were later encoded using one of the two methods.

The use of the first method meant assigning a 3-digit code to every primary protocol. These codes consisted of a digital code and 2 symbols (the symbols were chosen from the primary protocols, one from the incoming common transmission and the other one from the personal transmissions). An example of such 3-digit code is **1SO**.

The second method meant assigning a fraction number code to a protocol. The first digit corresponded with the points awarded according to the first scale, the second digit corresponded with the points from the second scale, e.g. **3/7**.

The data contained in other protocols was encoded using only the second method; therefore it was assigned a fraction number code. The analysis of all data, systemized according to the aforementioned methods has lead to an important methodological conclusion.

The conclusion

To coordinate the information flux in Kozyrev's space the day before the 10/08/15 experiment, Dr. Kuznetsova prepared virtual maps of the operators' transition of consciousness (quantum superposition) from the genuine mirrors in the information flux of energy – time in Kozyrev's Holographic Universe, based on the project's core hypothesis.

Map #1. Starry sky. Images of the Moon, The Orion Constellation, the Pleiads, Arcturus, Sirius

Map #2. Virtual map of possible cosmic points of conjugation.

Map #3. Consciousness' trajectory of movement between the Earth and the Moon; real-life images of Tatevsky Monastery, in Sun, Armenia, Belukha Mountain in Altay, Russia, and Temple of the Inscriptions in Palenque, Mexico.

We have also established a vibrational frequency chart to be used as a means of data transfer during the transmission sessions in Kozyrev's Mirrors. The chart was developed from the Informational Modules Program. "Informational Modules" is a form of quantum teleportation technique that can be employed inside the operator's consciousness, created during experiments that were conducted in Kozyrev's Mirrors. It includes:

- octahedral pattern of perception (information perception via pyramidal holography)
- the "broadcast grid" – mathematical matrices of 11x11 (121) and 21x21 (441) sizes
- radial matrix: digital codes in the operator's consciousness, functioning according to fractal holography principle. The

codes are used to operate various data layers during the simulation of virtual spaces.

The vibrational frequency chart includes an encoded expression of the symbolic data received from the collective consciousness. It was interpreted via module structures from the previous experiments conducted by the operator:

- ! Synchron 11.11.11 Matrix;
- ! Arguelles Matrix, dedicated to Factor Maya's research;
- ! Digital Matrix of Collective Consciousness "Orion 2013";
- ! Bulgaria – the gold of Trakia Digital Matrix of Collective Consciousness ;
- ! Bast matrix – Egyptian code.

The rise of Orion and its connection to the Sirius System was a crucial factor in reception of the information for this research. Sirius System is also connected to Factor Maya, Egyptian ancient civilizations as well as Agni-yoga's great masters' teaching, Banner of Peace and many others.

The role of information flux points of conjugation in Holographic Universe has also been studied within the framework of ISRICA's "Man in Kozyrev's Space" Project in 2015. The analysis of the data led us to some very important conclusions.

Hypothetic conclusions

1. This experiment has resulted into creation of a physical quantum model of human collective consciousness, which is able to interact with various points of intelligent Universe.
2. It seems that we were able to create a new, improved integral system of code signals that can be used for interaction between the participants of the experiment's collective consciousness and Cosmic Intelligence of a higher order in Kozyrev's Holographic Universe.

The success of the experiment is especially well demonstrated by a certain phrase transmitted by Dr. Arguelles's group, "*in*

lak ech (“we are the ones you’ve been long waiting for”), that was registered by both operators working inside the mirrors.

There were other effects of the synchronization: operator T., who was home during the experiment, described a Winged Apparition (an Angelic Creature) that they saw walking through the Mirrors.

The same apparition was also described by another participant, (P.), who was conducting the experiment in Italy.

3. 78 protocols submitted by Dr. Arguelles’s group amount to 78 (6x13) – a sum of clear tones on Pakal Votan’s tomb according to Factor Maya method of calculation. During the 20.03.15 solar eclipse experiment ISRICA received 11 protocols from Dr. Arguelles’s group.

| | | |
|--------------------------------|----------------------|--------------------------|
| 11+78-89 | Kin of Birth VV – 11 | Kin of Departure VV – 89 |
| 119 protocols of this research | | 11.9 or 9.11 |

It is possible to suggest that through these digital signals we’ve received a transmission from VV.

We can also assume that via these transmissions Dr. Arguelles has sent us some important information. The data that was received during this experiment will be discussed in 2016 with the members Dr. Arguelles’s group, as well as the head of the Foundation for the Law of Time and Galactic Research Institute.

V.P. Kaznacheev’s ISRICA thanks all participants of Man in Kozyrev’s Space Project, dedicated to professor N.A. Kozyrev, Dr. Jose Arguelles and Academician V.P. Kaznacheev.

Additional information about the matrix: Integral Fractal Matrix (IFM). IFM's core module is a digital matrix (Banner of Peace being its marker), that reflects the frequency characteristics of unvisualised objects in Kozyrev's Space which were registered by the participants of this research project during the Rise of Orion on 11/08/2015.
