**The Cradle in the Sky**  
(written on Kin 135/Planetary Moon 20)

Aloha Planetary Kin!

One of the aspects that I missed in the last download of the *Story in the Skies* came before the Full Moon of Taurus or the Wesak Full Moon. It is the day of the conjunction of Venus and Uranus.

While I did mention that they were going to conjunct at the last degree of Taurus. I didn't look at the whole energy of the astrology for that day. It happened to be the first quarter moon, 4/23/26 halfway between the new moon and the full moon which I talked about.

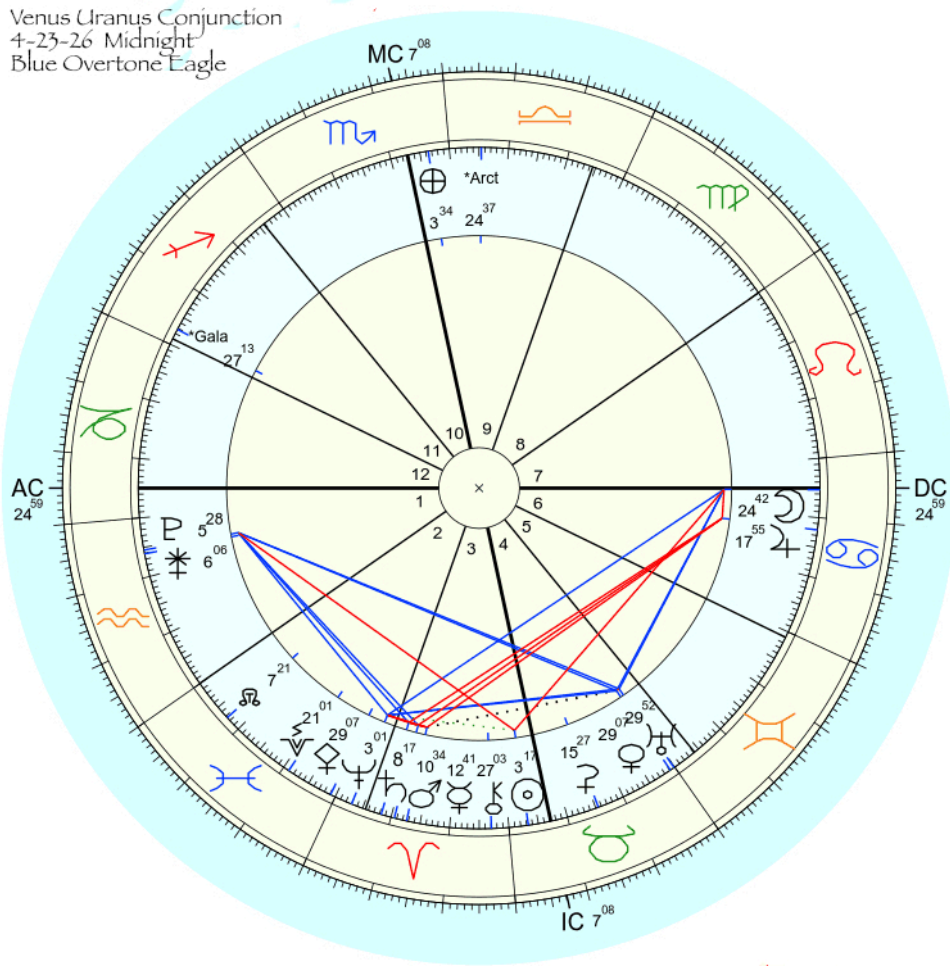

Not only is Venus conjunct Uranus on this day. But also the Moon moves over to conjunct Jupiter and both of them have moved enough to create another Mystic Triangle. We talked about the Mystic Triangle in the other story as it contained all of the planets within its positive energy except for Jupiter.

When Jupiter and the Moon conjunct and create the other Mystic Triangle, they actually create a sextile to the end of the first Mystic Triangle and they create a trine to the vertex of the first Mystic Triangle. This creates an incredibly positive aspect known as "The Cradle". The Cradle is actually 1/2 of the "Grand Sextile".

At midnight on the first quarter moon, the Cradle spans all the way from sunset to sunrise on the chart. Within the planetary parade, all the planets are below the horizon and they are contained within the positive aspects of the Cradle. Holding and nurturing them in it's loving arms.

The Cradle also infers the nurturing of a birth. So the new beginning/new paradigm based on the Return of the Goddess is being cradled and nurtured by a planetary parade all the way across the sky.

One of the most amazing things about the aspect of the Cradle is that at every point and every vertex of the Cradle, there is the conjunction of both a Planet and a Goddess holding the corners of the positive aspects. At the beginning of the planetary parade is Pluto conjunct Juno, the Queen of the Goddesses. At the vertex of the first Mystic Triangle and the point of the second Mystic Triangle is the conjunction of Neptune and Saturn. I consider Neptune to be a Goddess because of the water aspect. Then we move to the next vertex of the second Mystic Triangle which is now the end point of the first Mystic Triangle as well and that is where the Venus Uranus conjunction occurs. Then the planetary parade ends with the final point of the second Mystic triangle where the Moon Goddess and Jupiter have moved over to anchor that point.

The Cradle is only in effect while the Moon is there conjunct Jupiter. When it moves on to be the Full Moon, the aspect goes back the single Mystic Triangle which we discussed in the last article about

the Wesak Full Moon. But it sets up for the recurrence of the Cradle in the subsequent New and Full Moons.

In the calendar this day was Planetary Moon 20 - Blue Overtone Eagle... I Empower in order to Create... nurturing the birth of a new beginning/new paradigm within the Planetary Moon of Manifestation.

The New Moon falls on 5/16/26. Here we see the return of **The Cradle** and its Evolution over the 3 weeks in the daytime sky. The New Moon, the Sun and Ceres are all conjunct at the vertex of the second Mystic Triangle. So, that's 2 Goddesses joining with the Sun. They are also all 3 trining the Juno/Pluto conjunction at the point of the first Mystic Triangle. The vertex of the first Mystic Triangle has shifted to Neptune and Athena. So, two Goddesses are holding that vertex sextile to the Sun/Moon/Ceres conjunction.

Mercury has moved up to conjunct with Uranus and Venus who have moved out of holding the vertex for this aspect of The Cradle. Mars is conjunct Chiron right at the top of the chart. Venus, Uranus and Mercury are also sextile to the Mars/Chiron conjunction. The Goddess of Love joins with the Lightning Bolt of Uranus and Mercury communicates Love to Mars. Allowing Chiron to do the deepest possible healing of the masculine to prepare Mars to serve the Goddess for the reunion of the masculine and feminine and the Return of the Goddess bringing balance to the New Paradigm.

The whole parade is still led into the sunset by Pluto and Juno, the Queen of the Goddesses. While rising in the east is Jupiter conjunct the Part of Fortune. The Good Luck of the Part of Fortune and the power of Expansion from Jupiter anchors the cradle from it's final position.

In this configuration all the planets are in the daytime sky at once. Still all on the same side of the Earth. So, from the perspective of the solar system, ***Earth is the outside edge of the solar system on the side towards Galactic Center and Arcturus.*** Arcturus is directly opposite the Mars/Chiron conjunction. Galactic Centre is directly opposite the Sun, Moon, Mercury conjunction. So, at night we are in between the planetary parade and Galactic Center, able to receive direct communication and communion with Galactic Center and Arcturus. And the planetary parade on the other side of us in the Cradle, focuses the energy of Galactic Center, Arcturus and the Cosmos right back onto the Earth.

We are now in the Spectral Moon of Liberation... There is no Full Moon in the Moon of Liberation. There is only a New Moon... with only a New Moon, the Moon of Liberation is focused on New Beginnings. The Cradle allows for nurturing the Birth of a New Beginning! That's how we receive our Liberation!

From the perspective of the 13 Moon Calendar the New Moon is in the Red Earth Wavespell. This is where we Unify in order to Evolve by being able to Navigate through Synchronicity. The New Moon is on Spectral Moon 15 - White Lunar Mirror... I Polarize in order to Reflect.

The color White Purifies. The Lunar Tone allows us to Stabilize the Polarity between the opposites, which are creating chaos in our current existence. The Mirror allows us to see and Reflect the Endlessness in the Order of the Cosmos all the way down to physical manifestation and cut through the chaos, guided by Love... To establish a new paradigm where everyone can embody the Return of the Goddess... Where Divinity lives inside us, while we embody it to live in love, peace, harmony, and unity.
