

**NATURAL TIME COUNCIL REPORT
EL ABRAZO DEL AMATE
XIV COUNCIL OF VISIONS**

Limi 20 to Limi 27 of the Peacock Overtone Moon

On the evening of Silio 21 we inaugurated the Natural Time Council with the Circumpolar Rainbow Meditation. In total we were 26 people who were delighted with the meditation and from that moment we began to work with individual and group tutorials on the Law of Time.

Like an art exhibition, the council participants continually came to ask about us, about our visuals on display and received personalized or group information. Our main mission was to transmit the importance of living in Earth Time and we shared the tools of the Synchronary of 13 moons of 28 days and the Harmonic Module or Tzolkin. We also had visual information about more advanced levels on the Law of Time and to those who requested a tutorial, we shared it in the same manner.

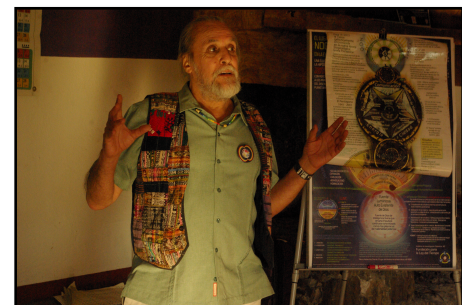

On Dali 22 in the afternoon we had the announced round table among various ancestral counts of days. A Quiché Maya girl attended, and kin from different parts of the republic participated in this beautiful round table for exchange. We all agreed unity and common purpose is necessary to free our minds of mechanized time.

On the morning of Seli 23 we shared a basic workshop on 13 Moons and Tzolkin, attended by around 25 people. In the afternoon, we gave a talk on the Advent of the Noosphere, which was attended by around 20 people.

On the morning of Gama 24 and throughout the day the individual and group tutorials continued.

On Kali 25 we received a visit from the Children's Council and we offered them a very fun workshop on Mayan numerology, the 13 Moon Synchronometer and the 20 Tzolkin seals. In the end they handmade their Kin masks and this was the best part! They knew who they were and

wondered what they could be when they grew up! We believe we added something important to this children's identity!

Parallel to the children's workshop, Roxane Claude offered a workshop on Family Tree.

On Alfa 26 we waited 6 hours for the Harvest Plenary to arrive to our place. Since our space was so far from the Peace Village and uphill. Finally, before dark, a large group arrived with whom we did the Noosphere Meditation. After the meditation, the people stayed for quite a while to be activated and receive

information on the Law of Time.

We consider that our participation as the Natural Time Council was a success. Many people learned from their Kin and the Law of Time. At the request of the participants we will continue giving workshops in Mexico City, Tepoztlán and Nayarit.

The only comment would be that being so distant and not very visible from the Peace Village, many people came up, but not as many as we expected. For the next Vision Council, we would like to be more integrated into the Peace Village.
