

Report on Heptad 30 - NS 1.37.8 (from Dali 8 to Silio 14) - in Los Cardales, Buenos Aires, Argentina.

We had the honor of promoting, organizing and facilitating the SincronizArte - Heptada 30 Retreat - which turned out to be a transformative experience for all 17 participating kin, who came from different parts of Argentina, and one kin from Chile.

During the first 7 days of the White Wind Wavespell, we experienced a wholesome retreat. At a beautiful country house immersed in nature, we created a safe and welcoming space for the participants to connect with the basic codes of the Law of Time, each one merging into its one essence through their galactic signature, sharing studies and games in groups of Root colored Races, Clans and Earth families.

Thanks to the morning meditations, psychophysical practices, transmissions and practical studies we were able to create an atmosphere of joy, unconditional love, peace and trust that fostered personal transformation and conscious noospheric connection. During the retreat, we shared profound knowledge about the galactic codes in the cyclic, synchronic and prophetic orders, and we were able to experience the domestic order synchronized with the Earth Families and Root Races. Each one of them offered, with much love and creativity, the preparation of the organic vegan food.

It was exciting to see how the kin participants began to question their beliefs and perceptions about the universal galactic codes and cycles, as well as their place in the cosmos. The experience allowed them to perceive things through the much wider and more connected filter of 'Time is Art'.

From those moments onwards, many of them already feel more confident, prepared and motivated to face the challenges of life with this new perspective acquired from the Law of Time.

We feel immensely blessed and grateful to have been able to facilitate and organize this event, and I hope that the participants can take with them the sense of peace, love and connection we all experienced during the retreat.
