

Vision of the Round Table with Vigesimal Fokus

Greetings Planetary Wizards, we are very pleased to share with you our Telepathic Experiment, sure that it might trigger you as it is still stimulating us.

The Round Table with Vigesimal Fokus, started on kin 112, Yellow Galactic Human, in the White Overtone Wizard Year, Ke White Magnetic Dog, at the School of Dragons (TryadÆmā 𐄂𐄃 - project of Lwx Votan) where we met as resonant beings to activate a vision, an unknown magnetic Fokus. An exploratory game with no expectations other than to create something new.

After receiving information about MATRIX 63, (for which we thank the Spanish kin), we added the new coordinates to the other three matrices; TIME, SPACE and SYNCH and the Telepathic Frequency Index has expanded greatly!

This marked the beginning of the vigesimal experiment.

We began translating this index into the vertical dot bar code with its equivalent kin, exploring an information field that we had never been connected with. From the very beginning, the numbers 11 and 22, Valum Votan and Bolon Ik, were repeatedly made visible and their sum 33 -Resonant Skywalker (kin/day on which this writing arrived).

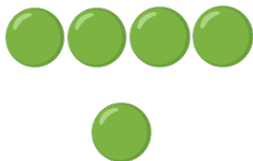

We have continued to give rhythm to this Fokus and the vision has been refined. The imaginative space manifested itself in a Round Table, around which we began to visualize ourselves with our kin, dot bar and with the vigesimal code of the day in the center of the Table. A further indication has arrived: that of leaving an empty space in the center so that the pulsations of the code could be free to move in any direction.

Experimenting with each heptad, at the moment on day Dali, we came to the creation of a Vigesimal Tzolkin that we shared with Stephanie South - Law of Time - a few months ago.

The experiment is continuing with no effort and the vision of the Genesis of the Moon-Camelot continues.

Gratitude to the Omnipresent Galactic Source.

The Vigesimals, kin 81

In lak'ech - I am another You

DISCOVERED IN PALENQUE A NEW 63-DAY MAYAN CYCLE

HOW THE DAILY CODE WAS BORN

Coinciding with the Crystal Solstice of the Yellow Galactic Seed Solar Ring (24/06/2014), news appeared in the media of a new discovery in Palenque, Mayan land, a piece of information that had been revealed in the Year of the Yellow Magnetic Seed, Kin 144 (1993), but which was not officially published until the Year of the Galactic Seed:

"With this find, the voice and discourse of the ancient Maya, moulded in stucco, they were heard again." The 63-day cycle is a kind of lost link, the missing cog, in addition to those already known – of 7, 9 and 819 days.

The discovery of the UNAM university researchers is the result of the multiplication of the first two numbers ($9 \times 7 = 63$) multiplied in turn by 13 ($63 \times 13 = 819$). 819 also corresponds to the number of days in 9 seasons, or noospheric pauses: $9 \times 91 = 819$

These numbers are not random, but were sacred to the Maya, who believed in the existence of an overworld or celestial region with 13 levels; of an Earth region (ours), with 7 layers, and an Infraworld with 9 levels.

Those who follow the practice of the SYNCHRONOTRON will be able to confirm that this Unit of the Base 63 Matrix, is the only one that is repeated every day SILIO, the 7th Gate of the Heptad that leads into the CUBE and the MAGUS OF INFINITY at 441.

Also, 441 is a multiple of this number: $7 \times 63 = 441$. So it is a cycle that is already contained in the pattern of 441. It is also very interesting to note that one of its multiples, 378 (63×6), also contains the Saturn cycle.

From the above arises the need to create a pattern of 63, in which the entire solar cycle of the 13 Moons of 28 days is encoded; Throughout the first half of the year we complete the left hemisphere of the brain, and in the second half of the year we complete the right hemisphere of the brain. After almost 2 years of research and study, it was a gift and an opening to hitherto unknown levels – and as always, in a simple way. The structure is very simple and moves for Heptads; thanks to it we can discover how each Moon goes into the different dimensions of time. It is perfectly consistent with all the cyclic movement contained in the other matrices of the 441. The pattern itself is mirrored, just like the Tzolkin: each diagonal that corresponds to the time of the 13 moons is mirrored, and gives as a result 365, the annual cycle of 365 days.

It begins as the Time Matrix, in the V.1-H.1 coordinate, and incorporates the counting of the days of the year – something that had not been taken into account until now and which has aroused great impression. As in all the other matrices, the 3 central columns remain free, and host the UR RUNES and the 9 ARK STATIONS. Observe that the latter are in the corpus callosum and are part of the 7th Mental Sphere, occupying $3 \times 21 = 63$ units – the last cycle of 63 of the matrix.

Observe how they move, you just have to follow the daily sequence, the day of the year: the first part of 7 or Crown Plane 4-D, is occupied by 9 verticals, therefore they include 2 Moons and the Heptad 9, the first of the Electric Moon. From there, we move on to the lower part, and follow the computation by entering the 5th Dimension of Radial Time, where it continues for 8 Heptads. Here, on this 5-D Heart plane, which we have entered, occupies only 8 Heptads, as on the right side; here too it occupies only 8 Heptads, so that, in the 9th Dimension of Time, only Heptad 17 in the Overtone Moon and Heptad 36

(17+36=53) penetrate. This results in 16 Heptads in the central part, just like in the TELEKTONON, which can be considered as the 16 Heptads of the Warrior's Cube. It is in this same 5-D Plane of the Heart that the Saturn cycle is completed, when the count reaches 378.

The count continues in the 3-D Root Plan, where we have both half of the year in the Resonant Moon, Heptads 25 and 26, and at the end of the year, with Heptads 51 and 52. The operation is the same as for any 441 matrix: you search for the coordinate and locate it in the Base Matrix, indicating the UMB corresponding to the DAILY CODE.

See what day of the year you were born, locate it in the matrix, and you'll have your new UMB. We'll add this information to the Synchronometer of the 13 Moons of 28 Days of the New Year. Everything is a cosmic game... Let's learn how to play!!
